

K) 3-Fenil-4-metilciclo-hexeno

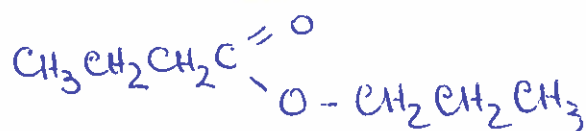

l) Etanoato de etilo (2)

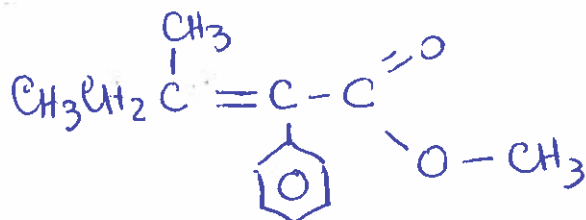

m) Etanoato de 2-metilbutilo

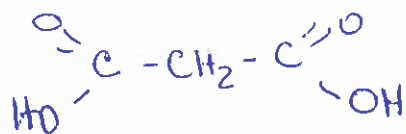

n) Butanoato de propilo

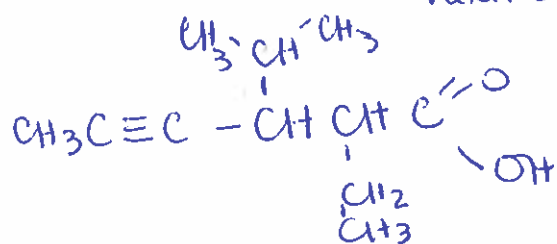

o) 3-Metil-2-fenil-2-pentenoato de metilo

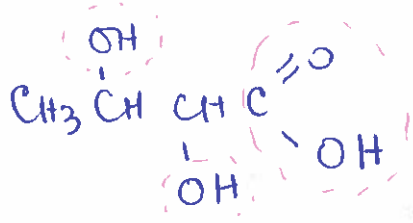

p) Ácido propanodióico

q) Ácido 3-isopropil-2-etil-4-hexinóico

R) Ácido 2,3-dihidroxibutanóico

A função ácido carboxílico
é caracterizada relativamente
a função álcool.
