

TERRA

Laboratory for sustainable
land use and ecosystem services

Working with river networks, problems, challenges and solutions

Paulo Branco

pjbranco@isa.ulisboa.pt

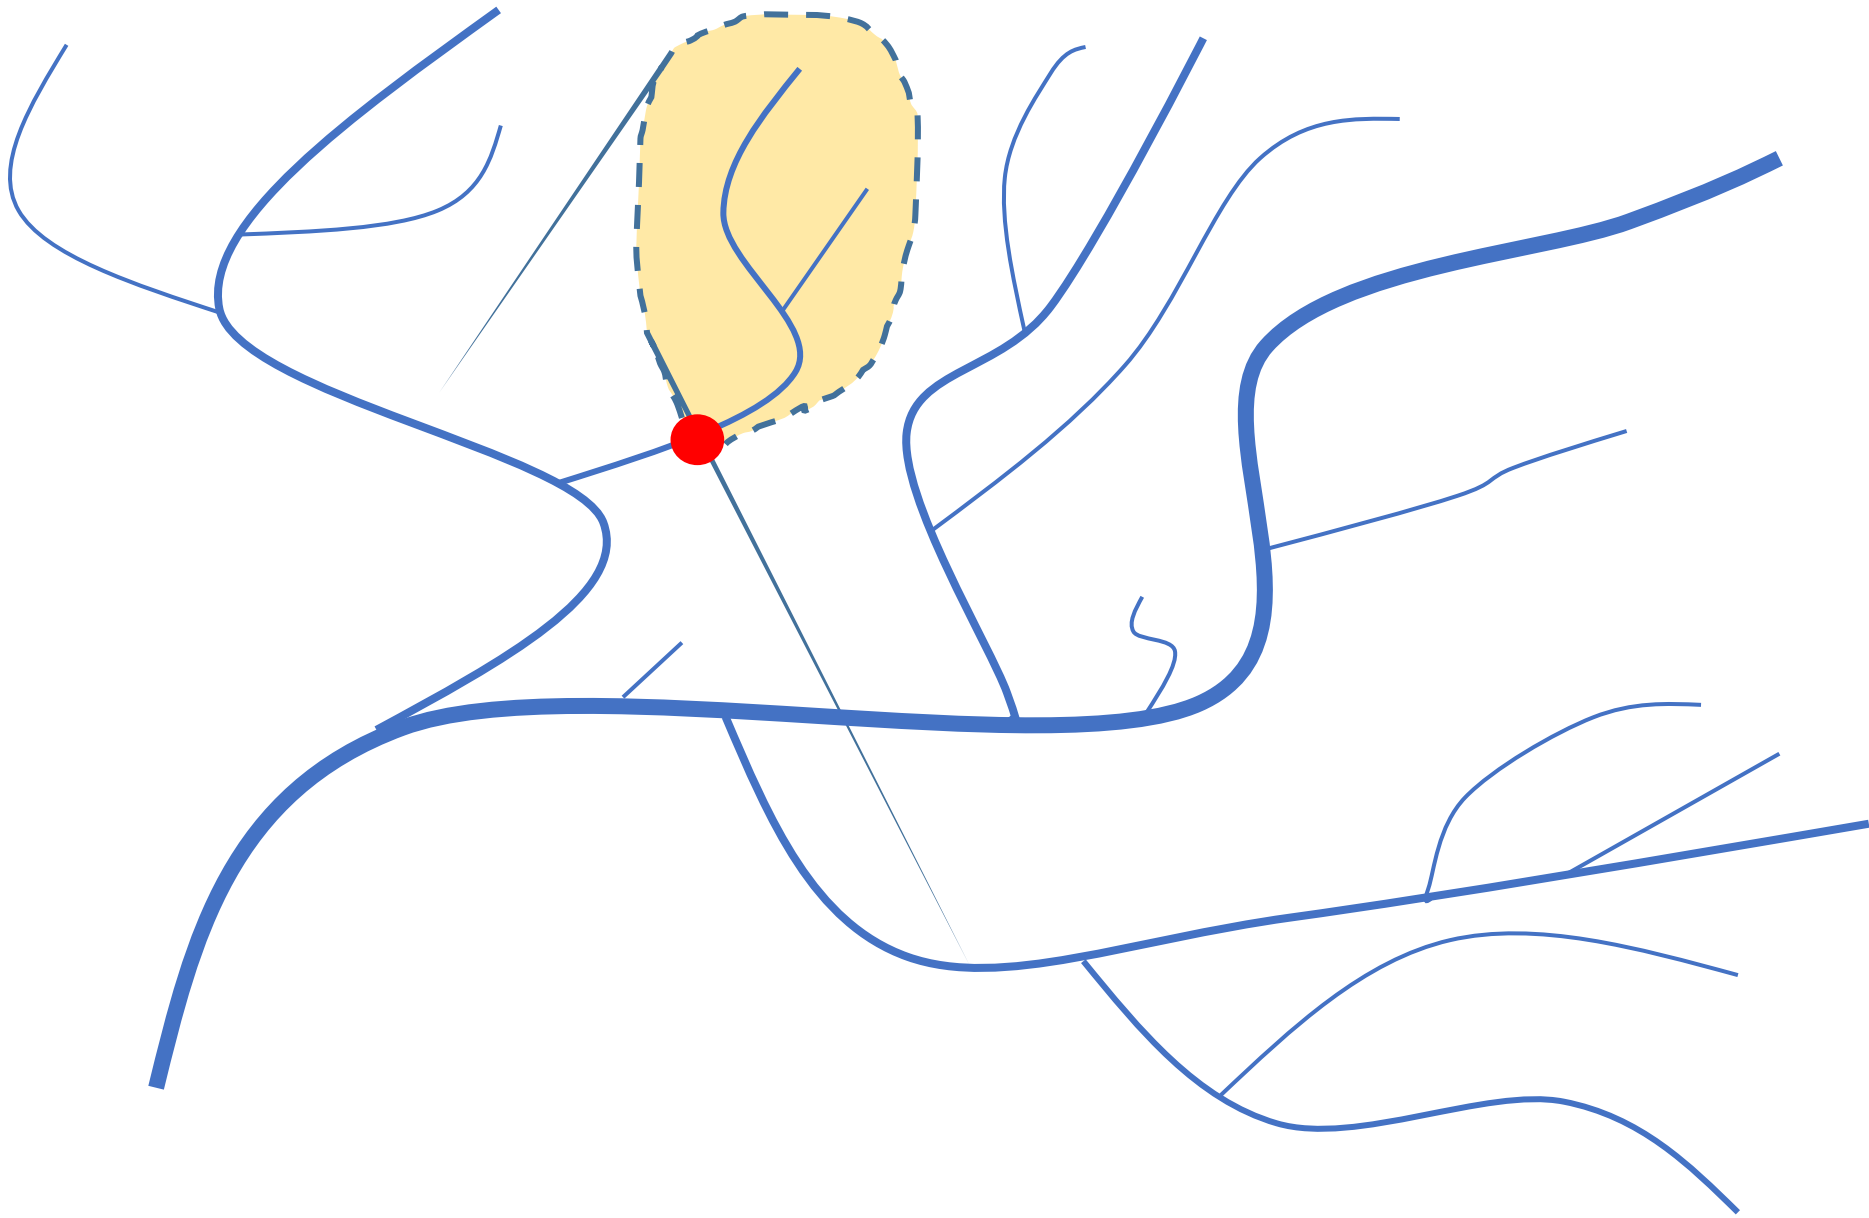

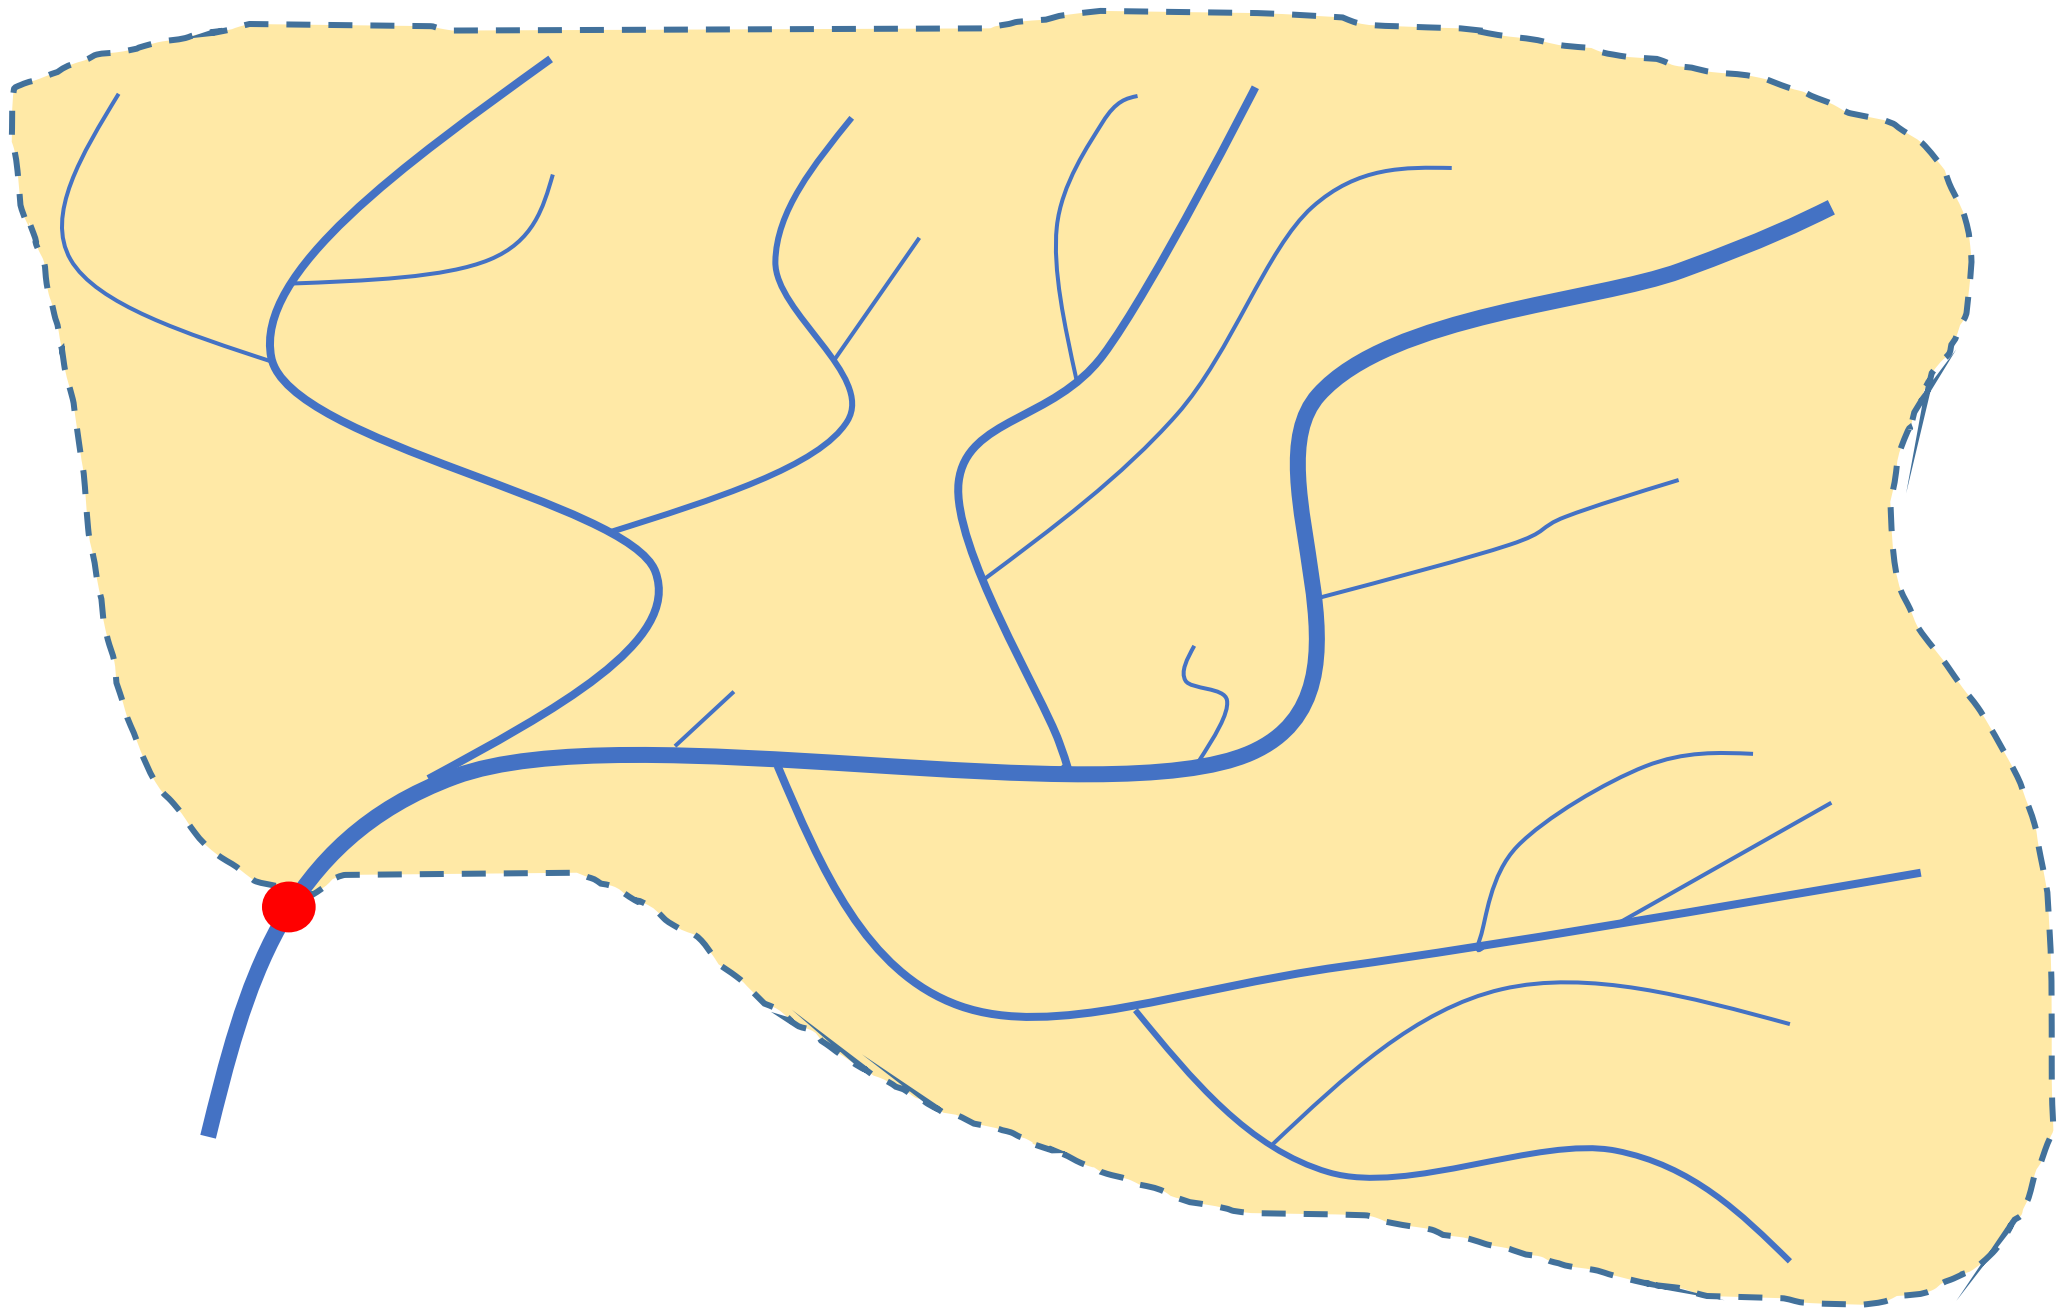

The background features a repeating pattern of light blue, stylized geometric shapes that resemble a digital signal or a series of connected line segments. These shapes are arranged in a staggered, grid-like fashion across the white background.

RVTTool

RivTool

Takes full **advantage of river network databases** like the CCM

Straightforward linkage between environmental and river network data

User-friendly & straightforward implementation

No topological restrictions as it is database driven

Dynamic outputs over time

Fast performance even with large datasets

Universal applicability

Works with **segment or sub-basin** as a basic **analysis unit**

A set of **ready-to-use libraries**

MERLIN

MEDLIN
MERLIN

needs**

**Restoration
potentials**

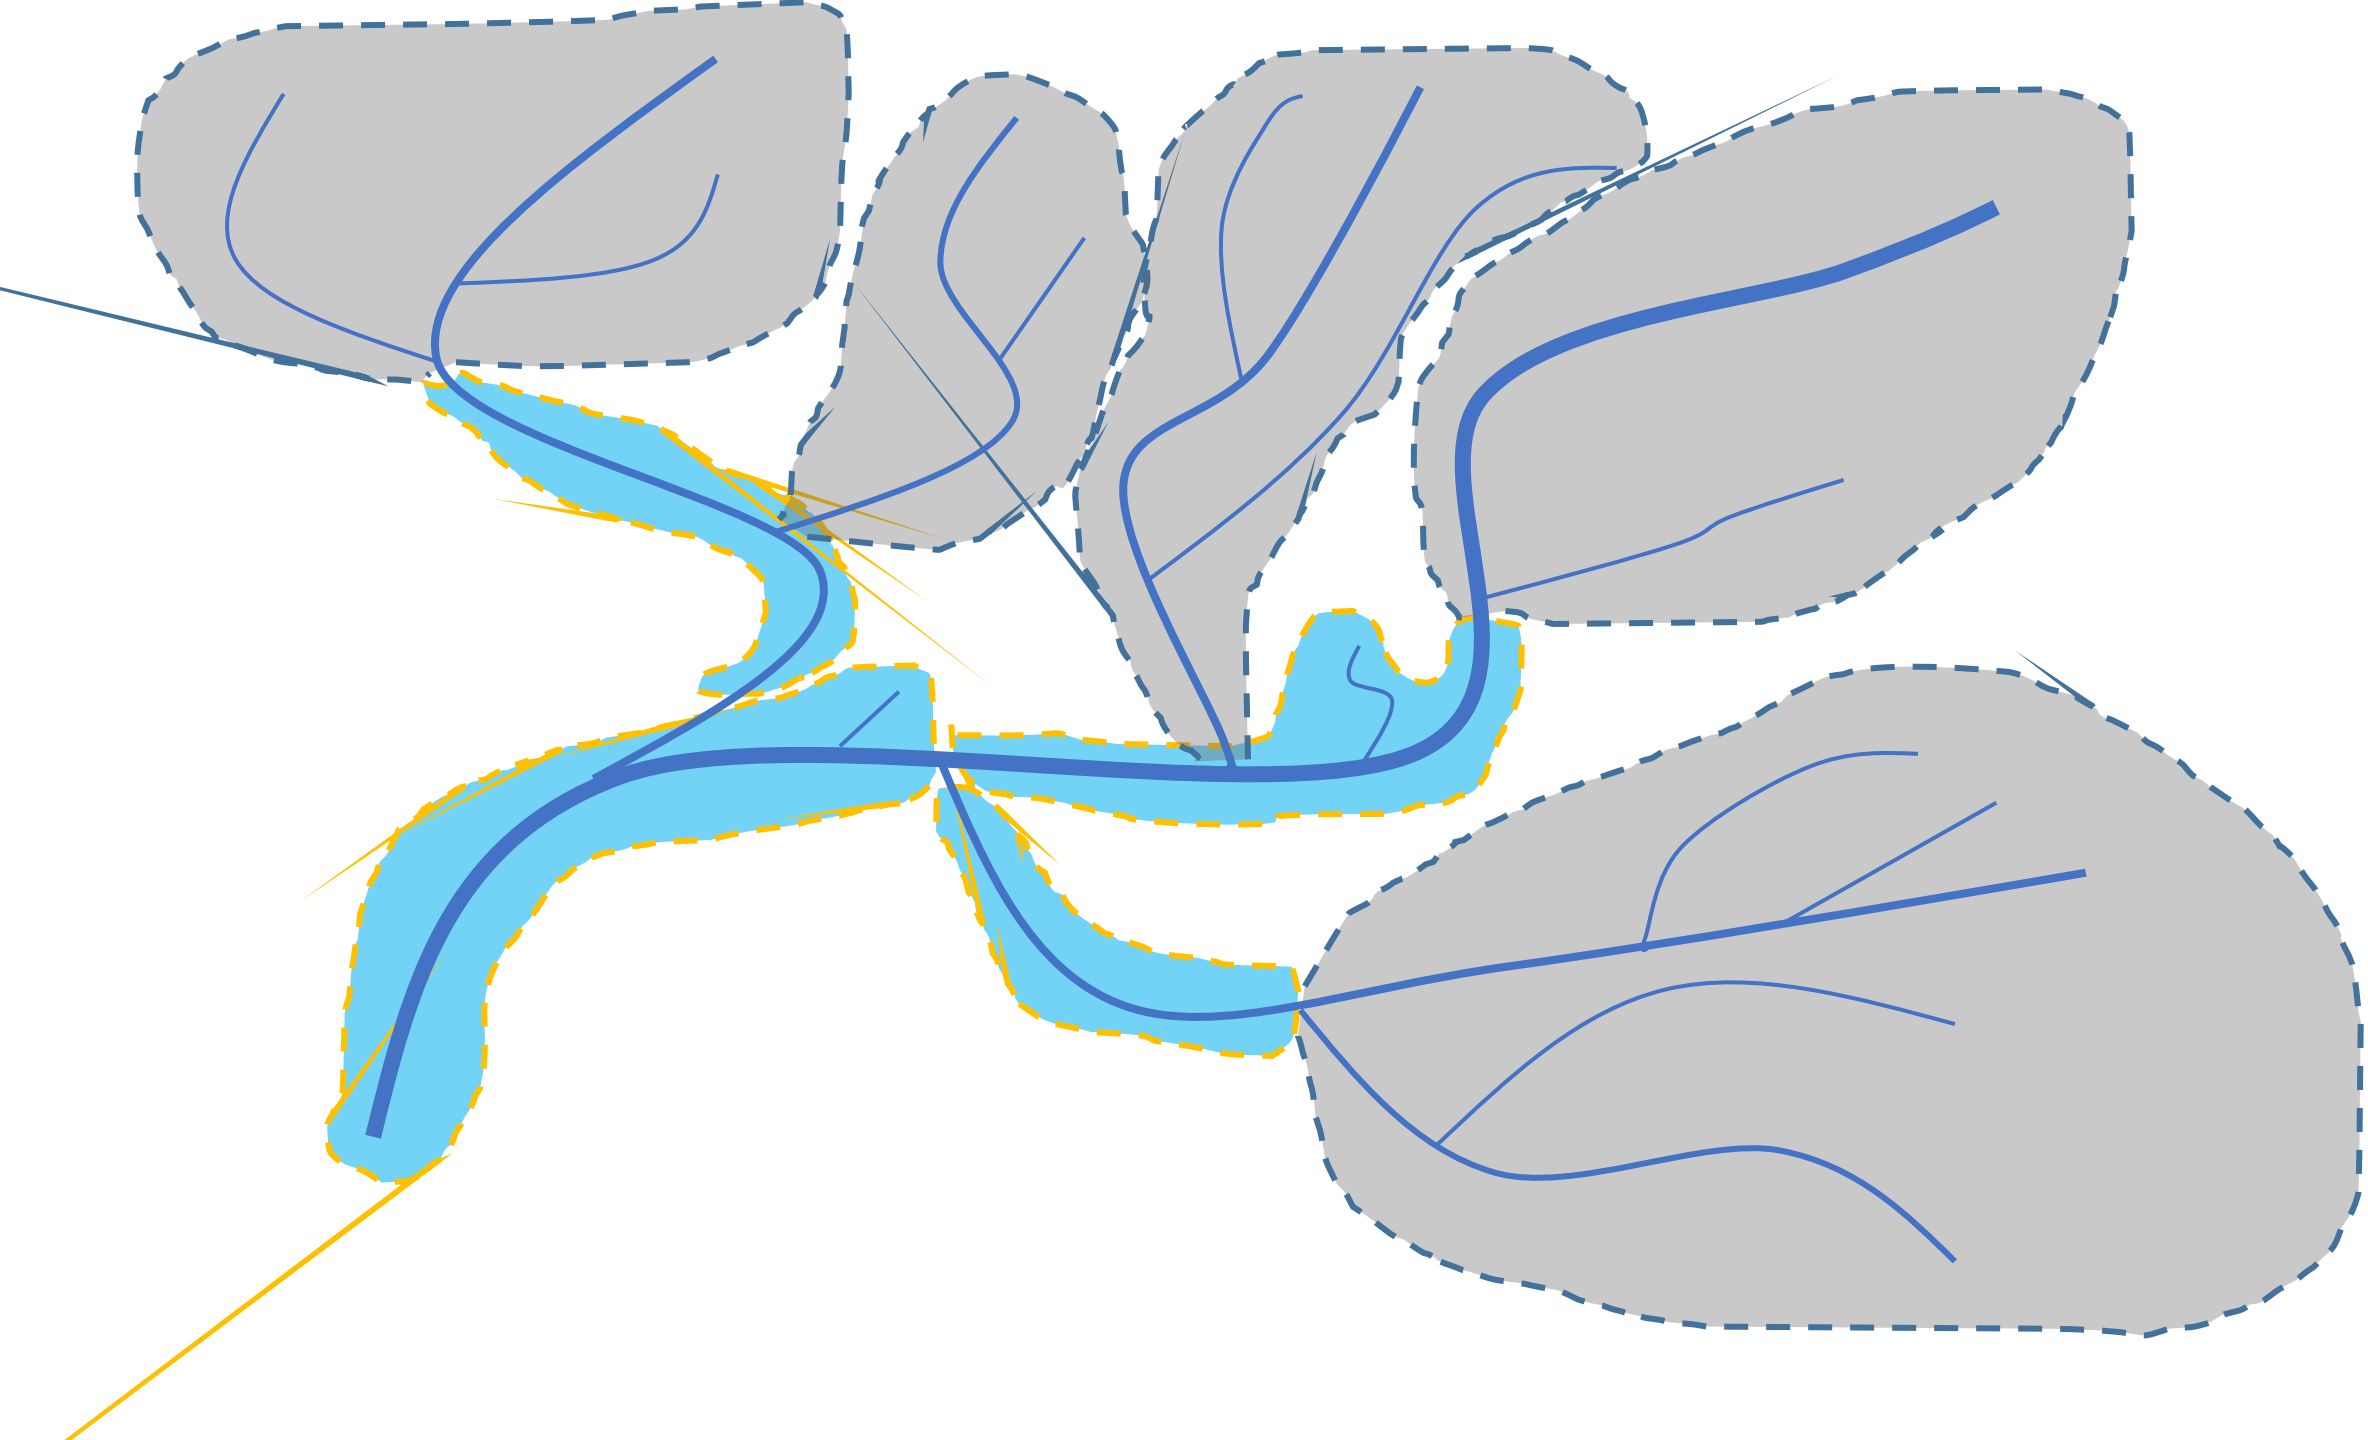

Typology of River Restoration Units

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020.
DOI: 10.5281/zenodo.7845755

0 250 500 km

River units typology

- | | |
|--------------------------------|------------------------|
| Large River head unit | Small river unit |
| Large river unit | Area of R2Us out of EU |
| Small river basin (sea outlet) | Basins |

Data source: EEA under the framework of Copernicus programme

Typology of River Restoration Units

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020.
DOI: 10.5281/zenodo.7845755

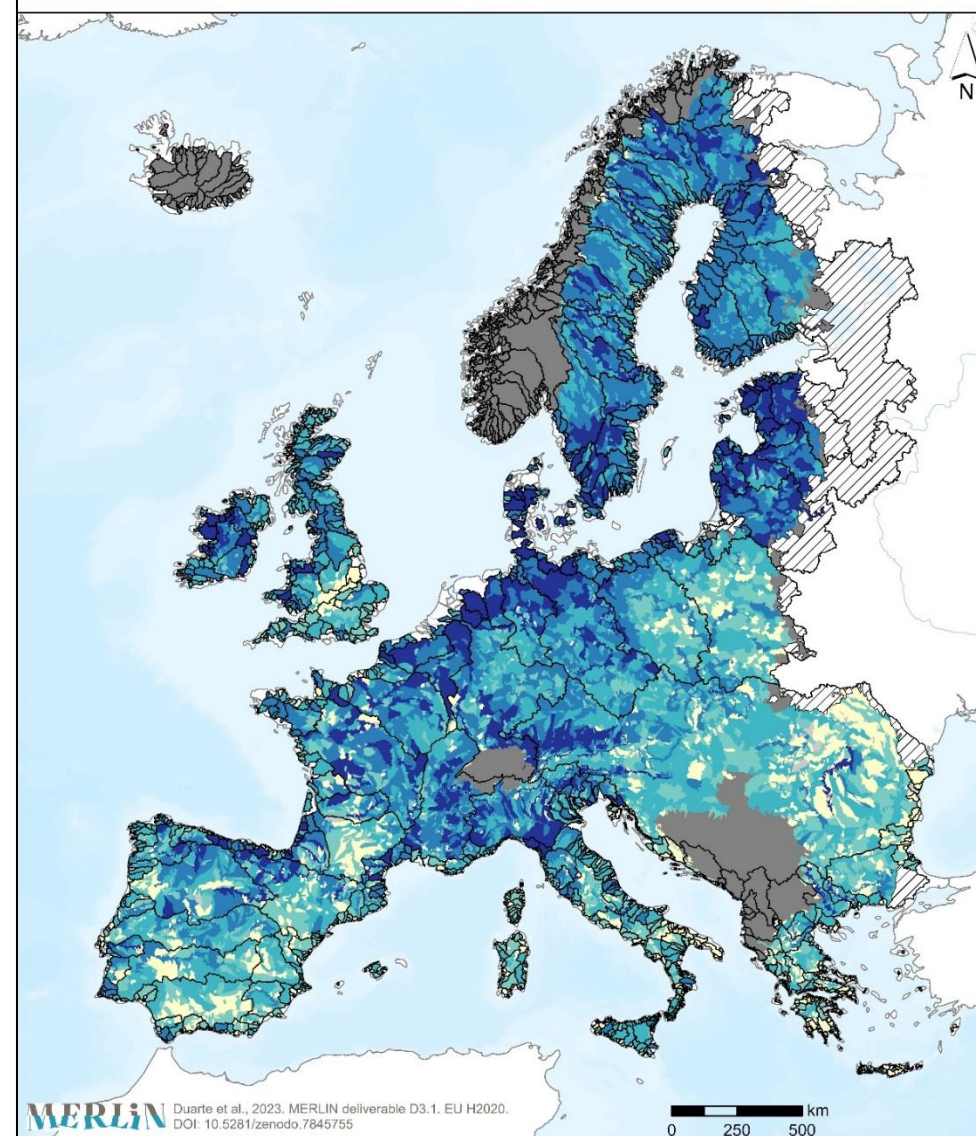

0 250 500 km

River units typology

- Large River head unit
- Large river unit
- Small river basin (sea outlet)
- Small river unit
- Area of R2Us out of EU
- Basins

Data source: EEA under the framework of Copernicus programme

Number of freshwater-related protected habitats under the Habitats Directive in River Units

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020.
DOI: 10.5281/zenodo.7845755

0 250 500 km

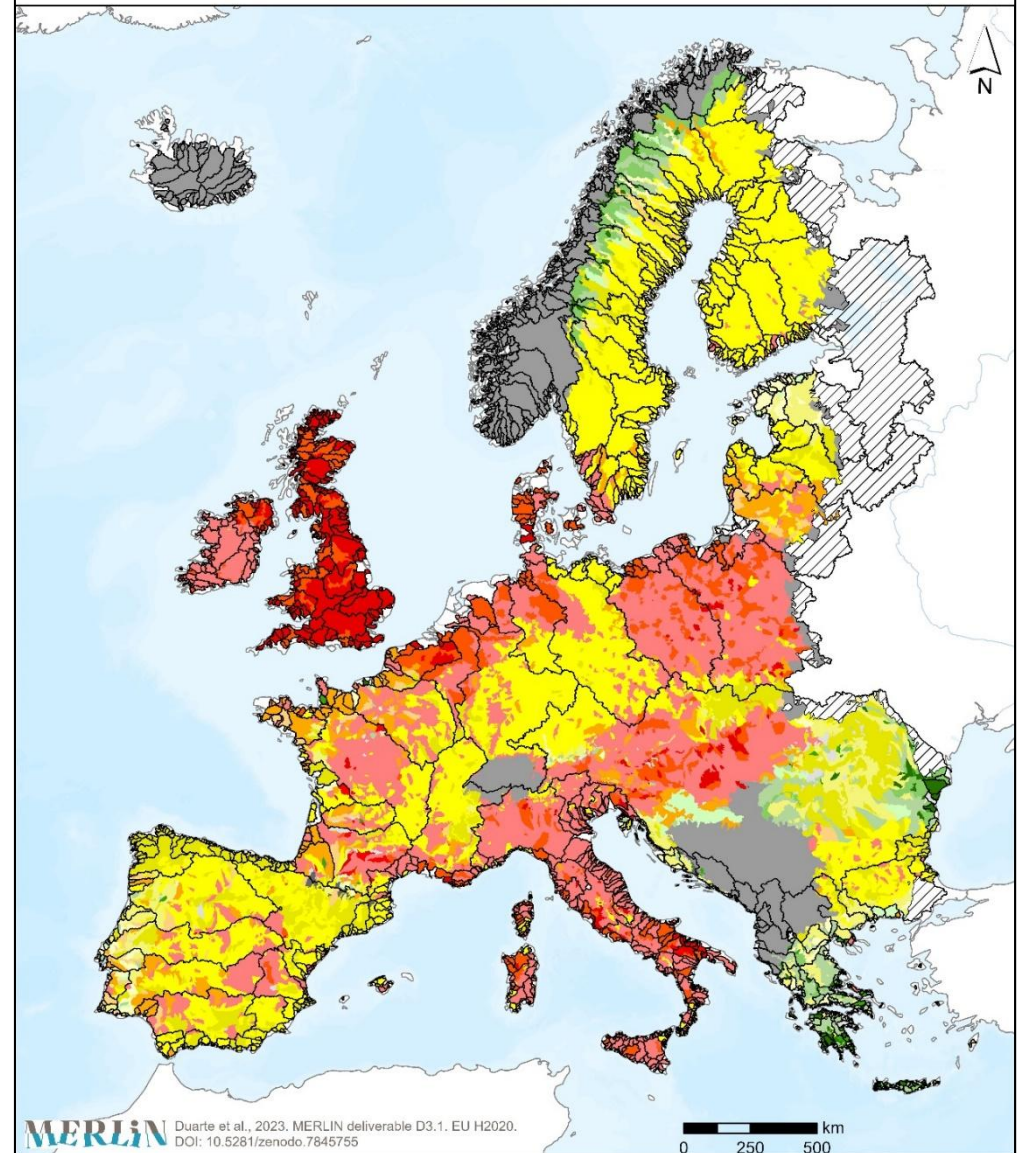

Number of Freshwater-related Habitats

- 1 - 4
- 5 - 7
- 8 - 11
- 12 - 15
- 16 - 23
- No data
- Area of R2Us out of EU
- Basins

Data source: Habitats Directive Article 17 Database

Habitat related needs

Detailed composite indicator of conservation status for freshwater-related habitats in River Units

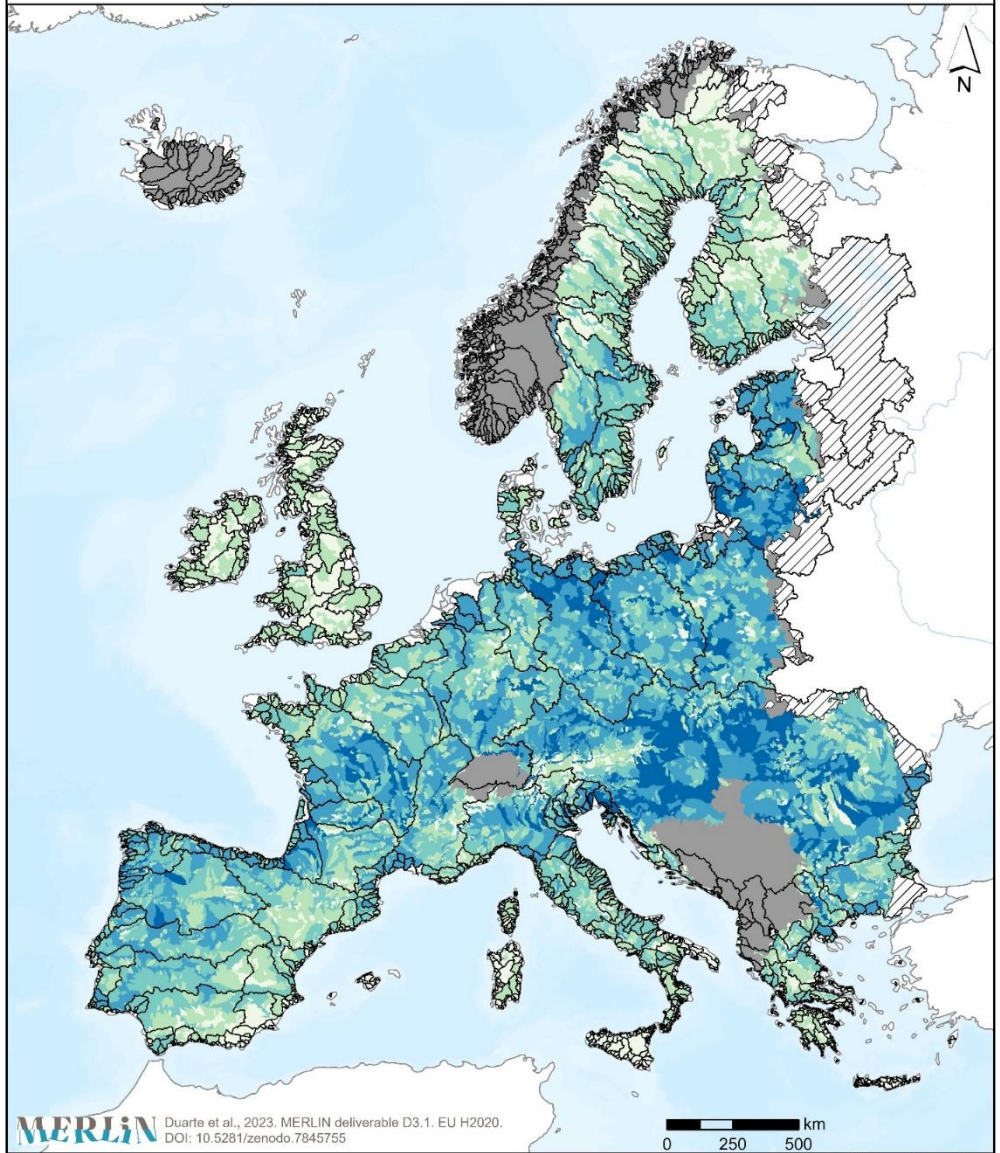

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020. DOI: 10.5281/zenodo.7845755

0 250 500 km

Data source: Habitats Directive Article 17 Database

Number of freshwater-related protected species under the Habitats Directive in River Units

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020.
DOI: 10.5281/zenodo.7845755

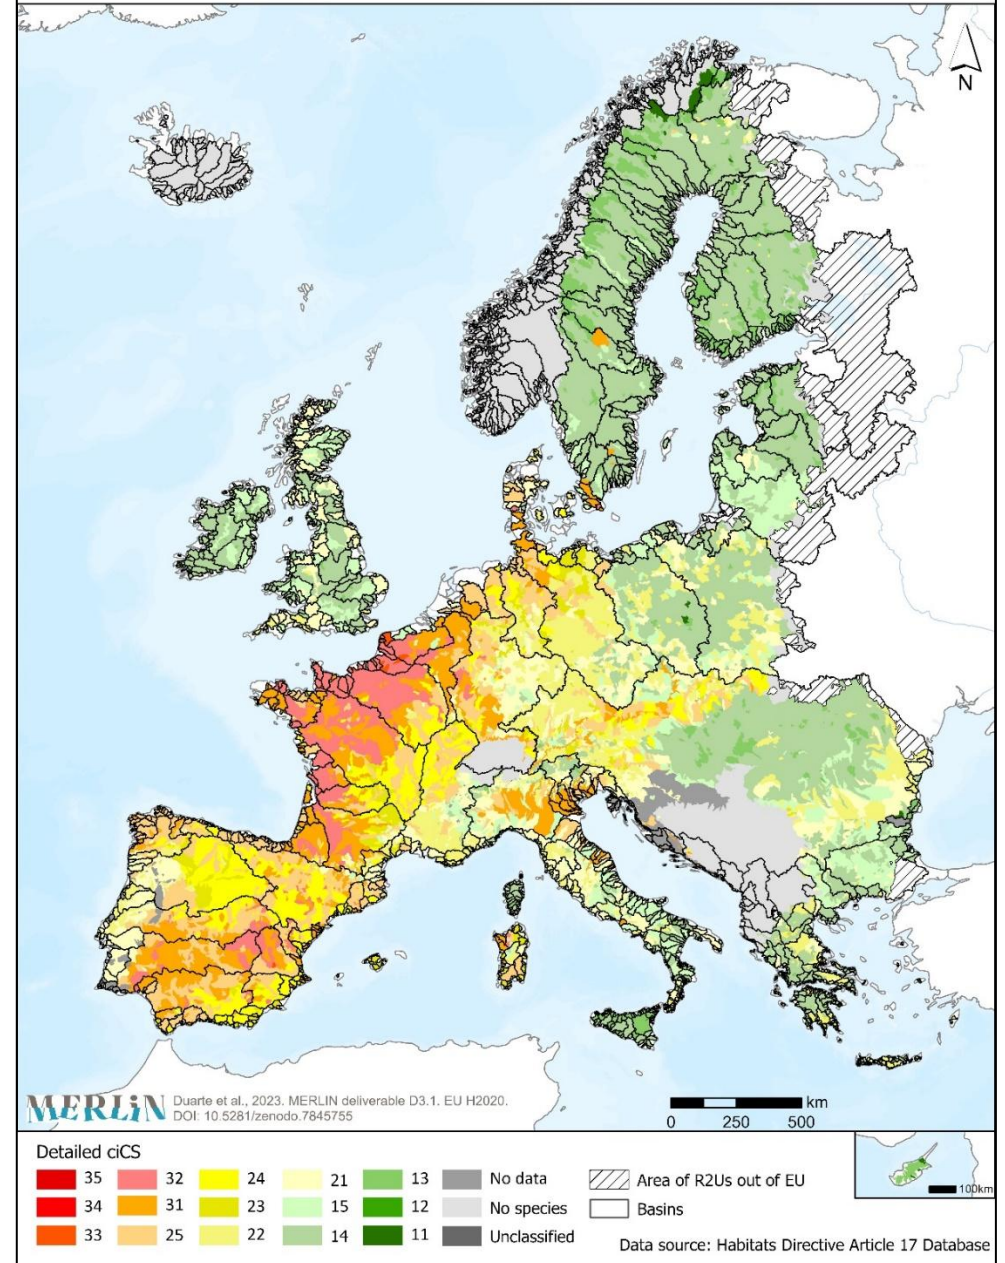

Number of Freshwater-related Species

- | | | |
|---------|---------|------------------------|
| 1 - 11 | 27 - 36 | Area of R2Us out of EU |
| 12 - 18 | 37 - 62 | Basins |
| 19 - 26 | No data | |

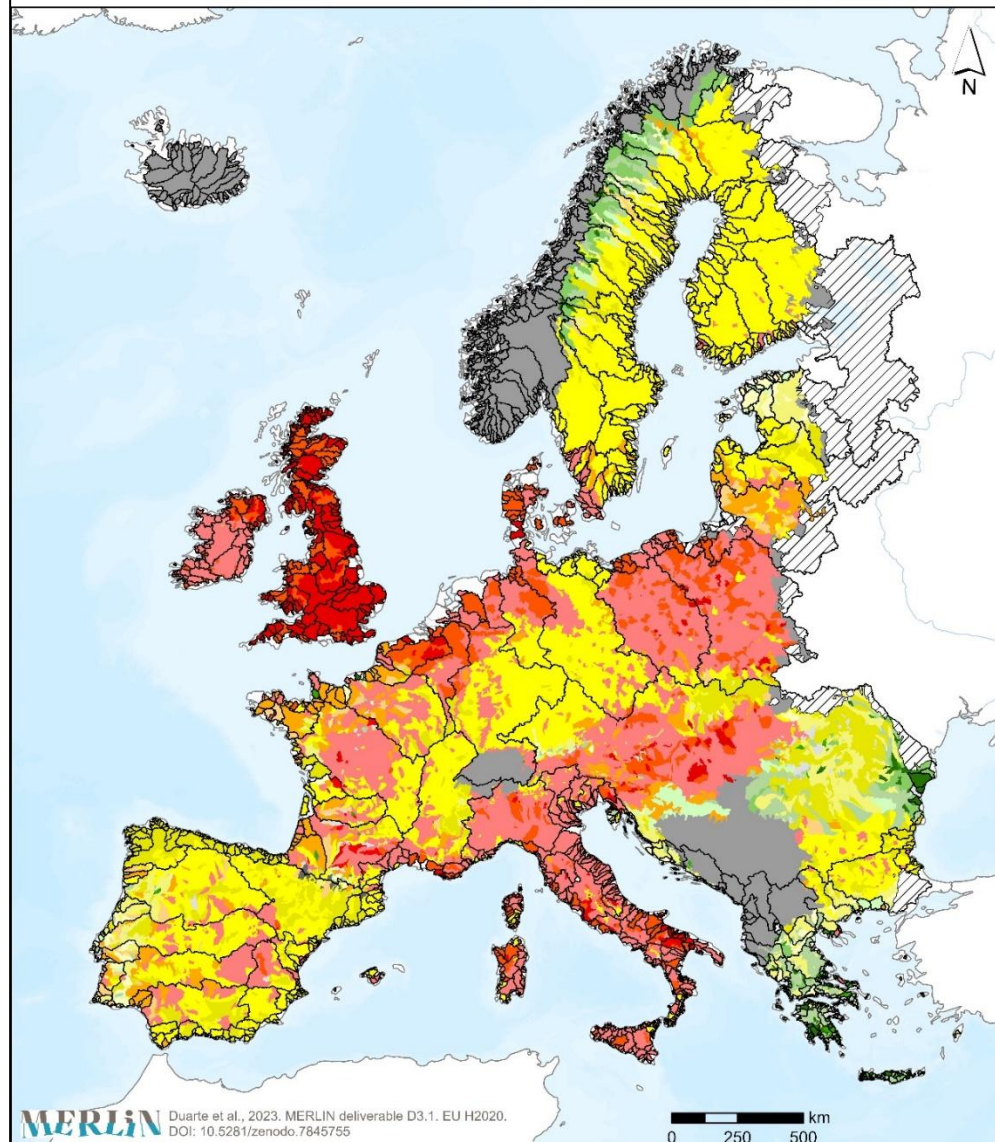

Data source: Habitats Directive Article 17 Database

Species related needs

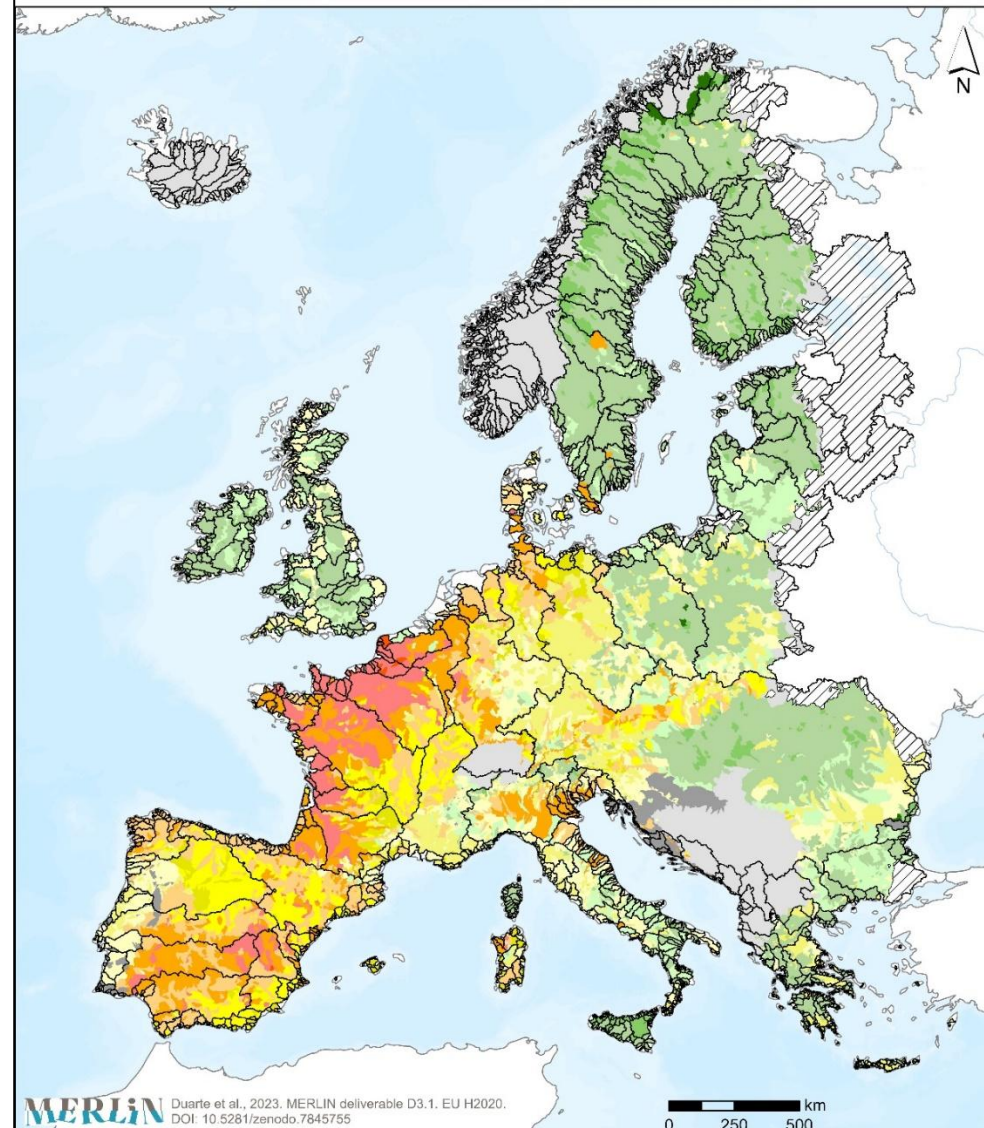

Detailed composite indicator of conservation status for freshwater-related species in River Units

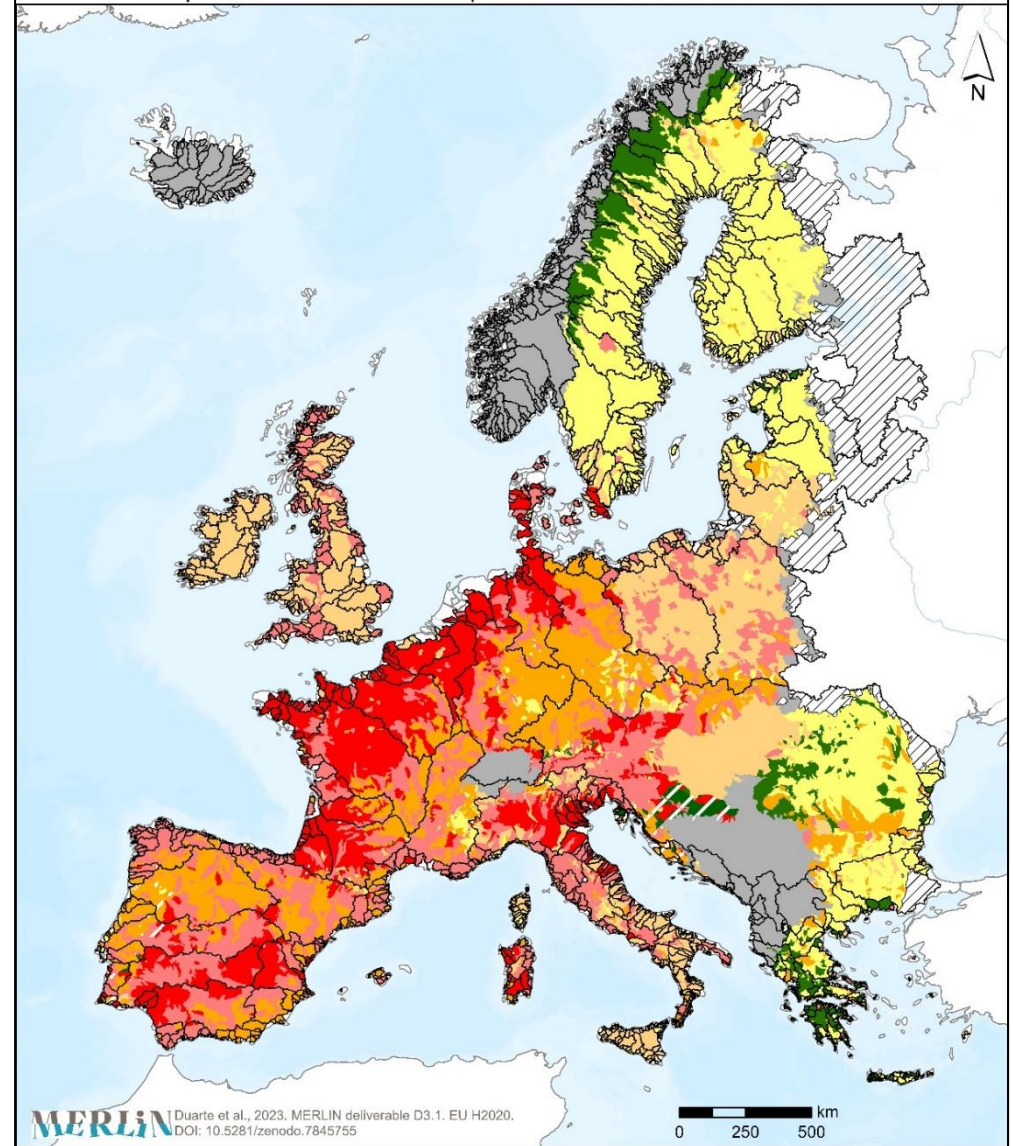

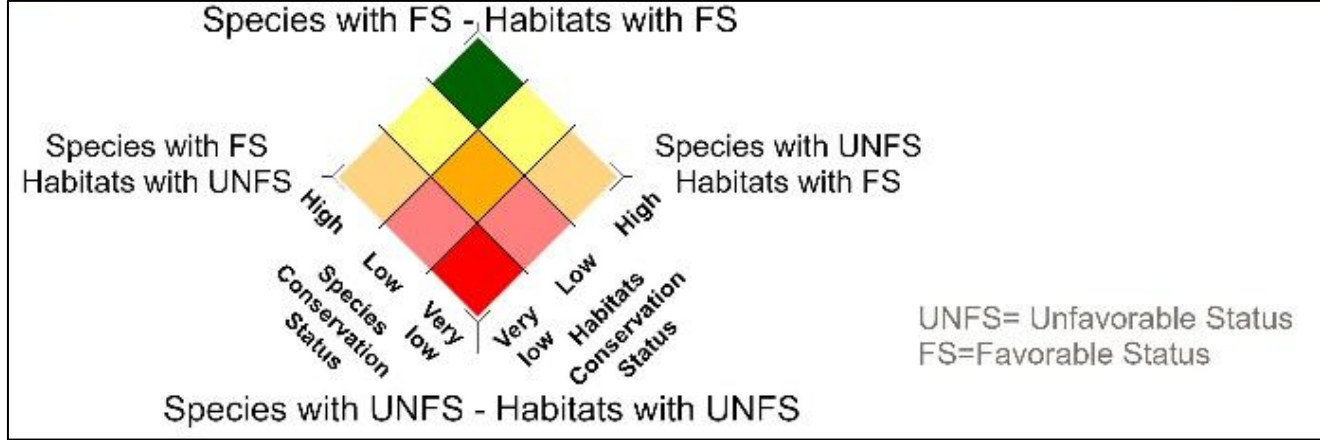

Detailed composite indicator of conservation status for freshwater-related habitats in River Units

Detailed composite indicator of conservation status for freshwater-related species in River Units

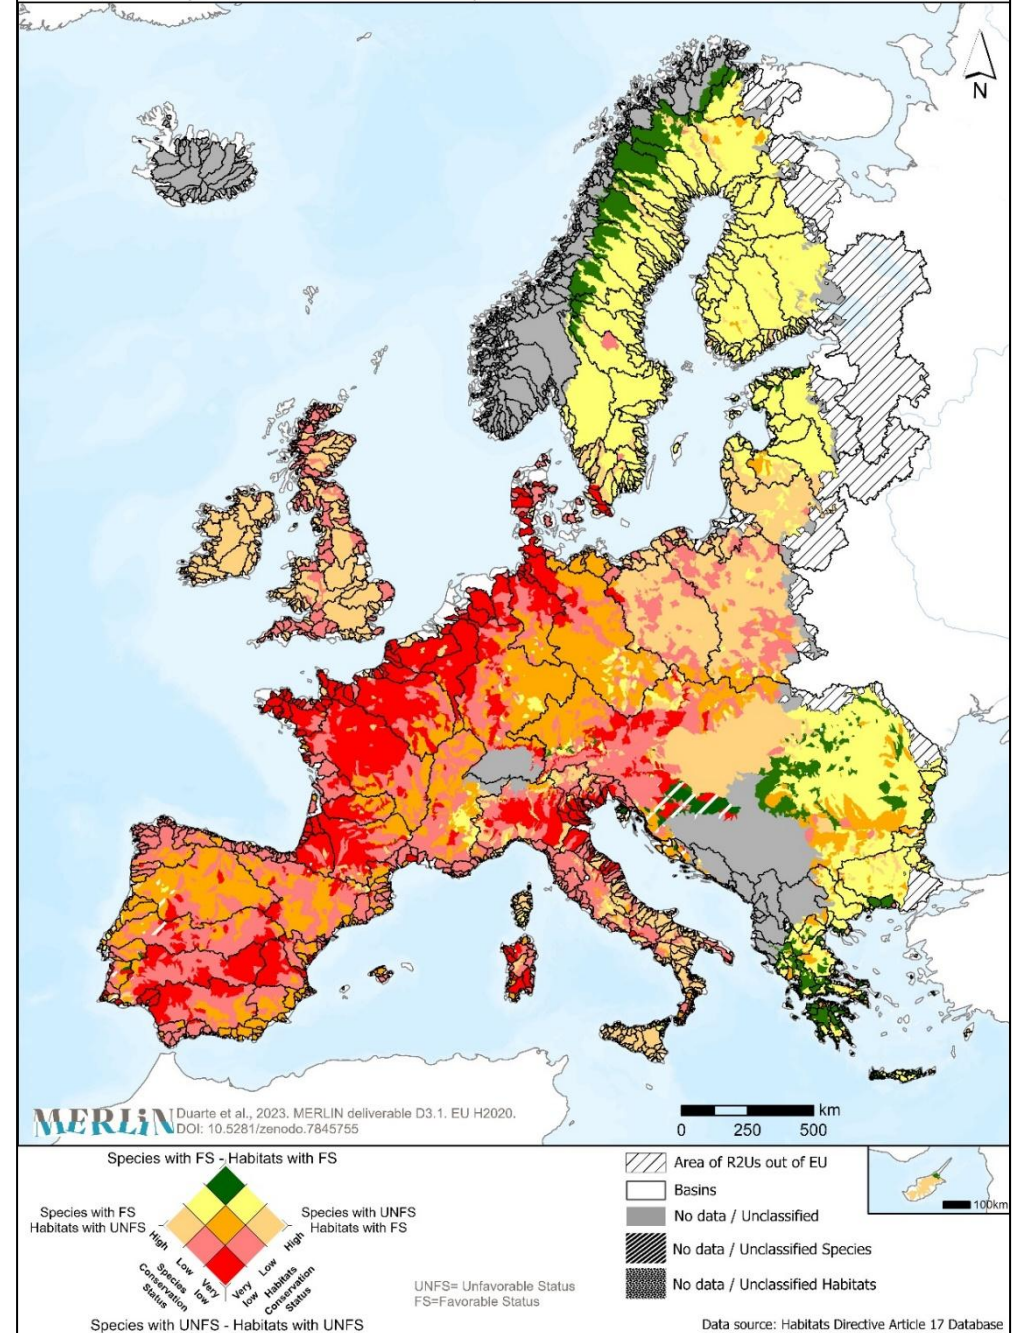

Integration of the composite indicator of conservation status of freshwater related protected habitats and species under Habitats Directive

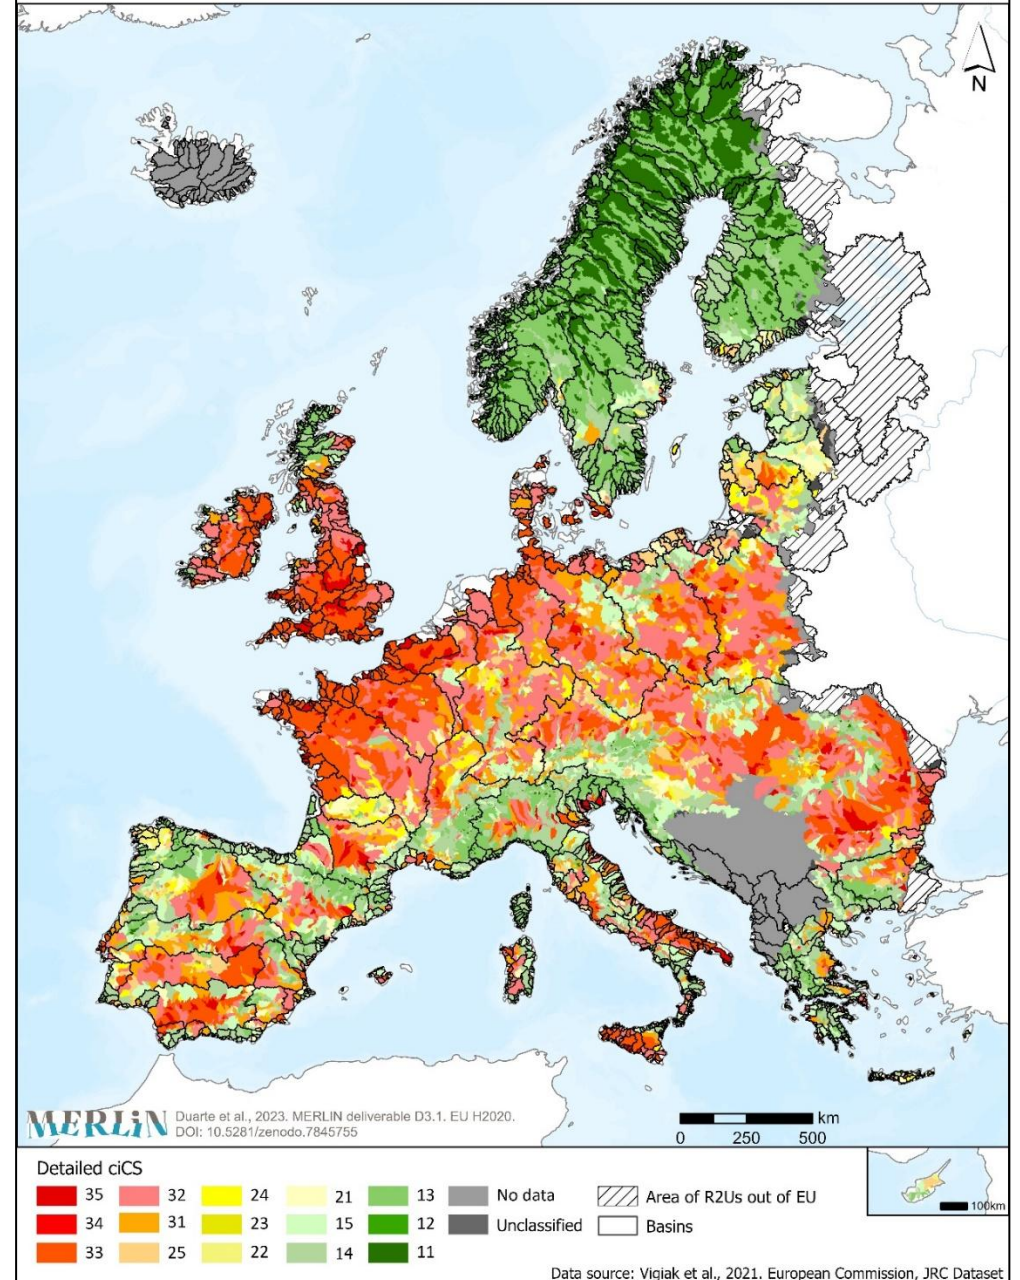

Habitats Directive needs

Integration of the composite indicator of conservation status of freshwater related protected habitats and species under Habitats Directive

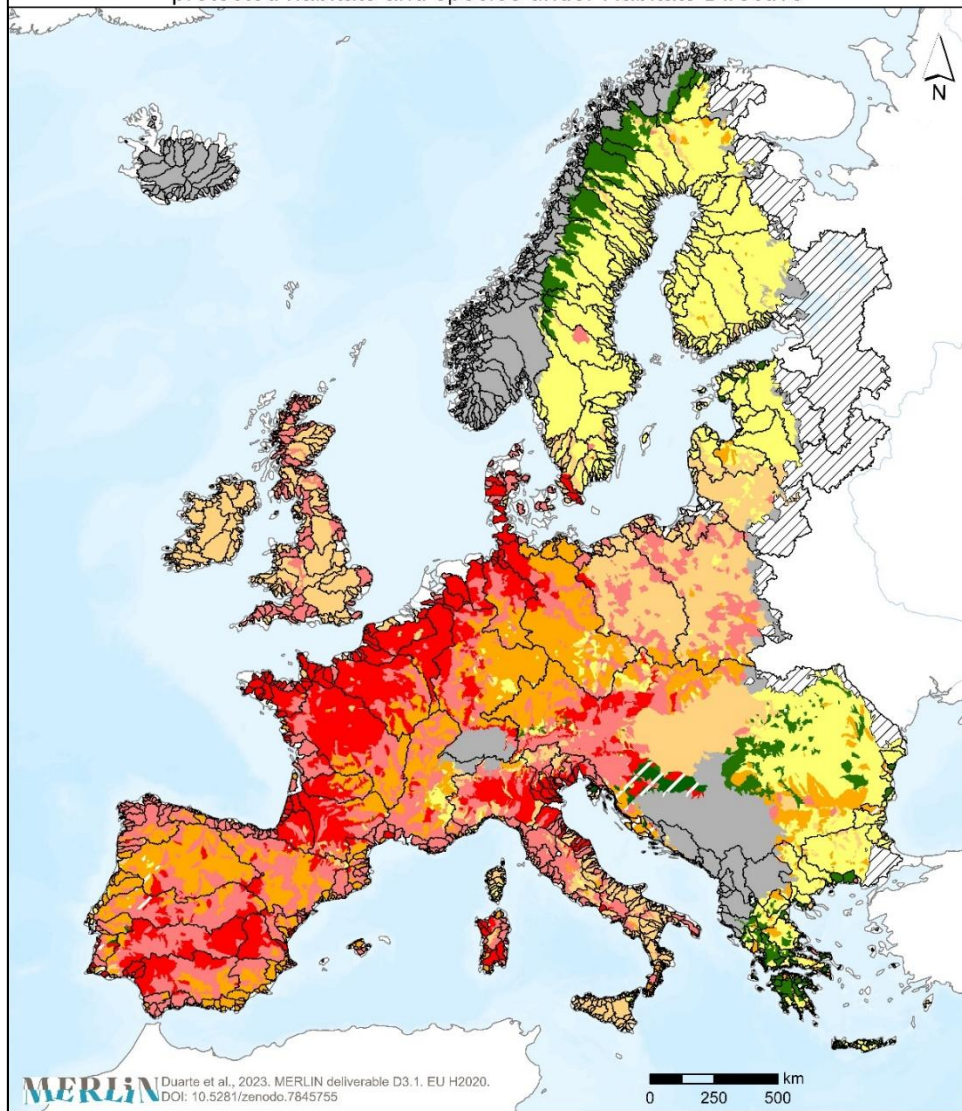

WFD needs

Detailed composite indicator of conservation status of Water Framework Directive good ecological status prediction

Integration of the composite indicator of conservation status of freshwater related protected habitats and species under Habitats Directive

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020. DOI: 10.5281/zenodo.7845755

Species with FS - Habitats with FS

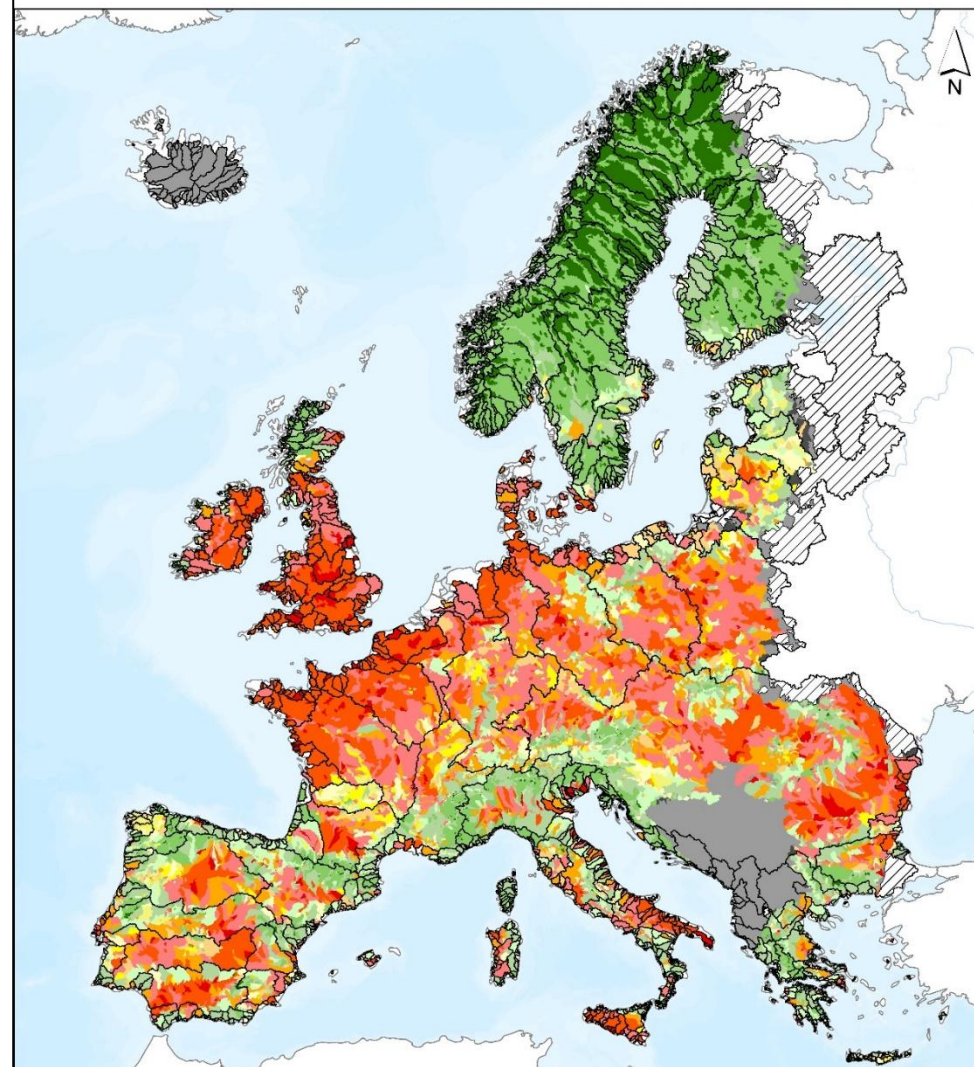

High	Low	Very Low	High
Species with FS Habitats with UNFS	Species with UNFS Habitats with FS	Species with UNFS Habitats with UNFS	Species with UNFS Habitats with FS
High	Low	Very Low	High
Species Conservation Status	Habitats Conservation Status	Species Conservation Status	Habitats Conservation Status

UNFS= Unfavorable Status
FS=Favorable Status

Area of R2Us out of EU
Basins
No data / Unclassified
No data / Unclassified Species
No data / Unclassified Habitats

Data source: Habitats Directive Article 17 Database

Detailed composite indicator of conservation status of Water Framework Directive good ecological status prediction

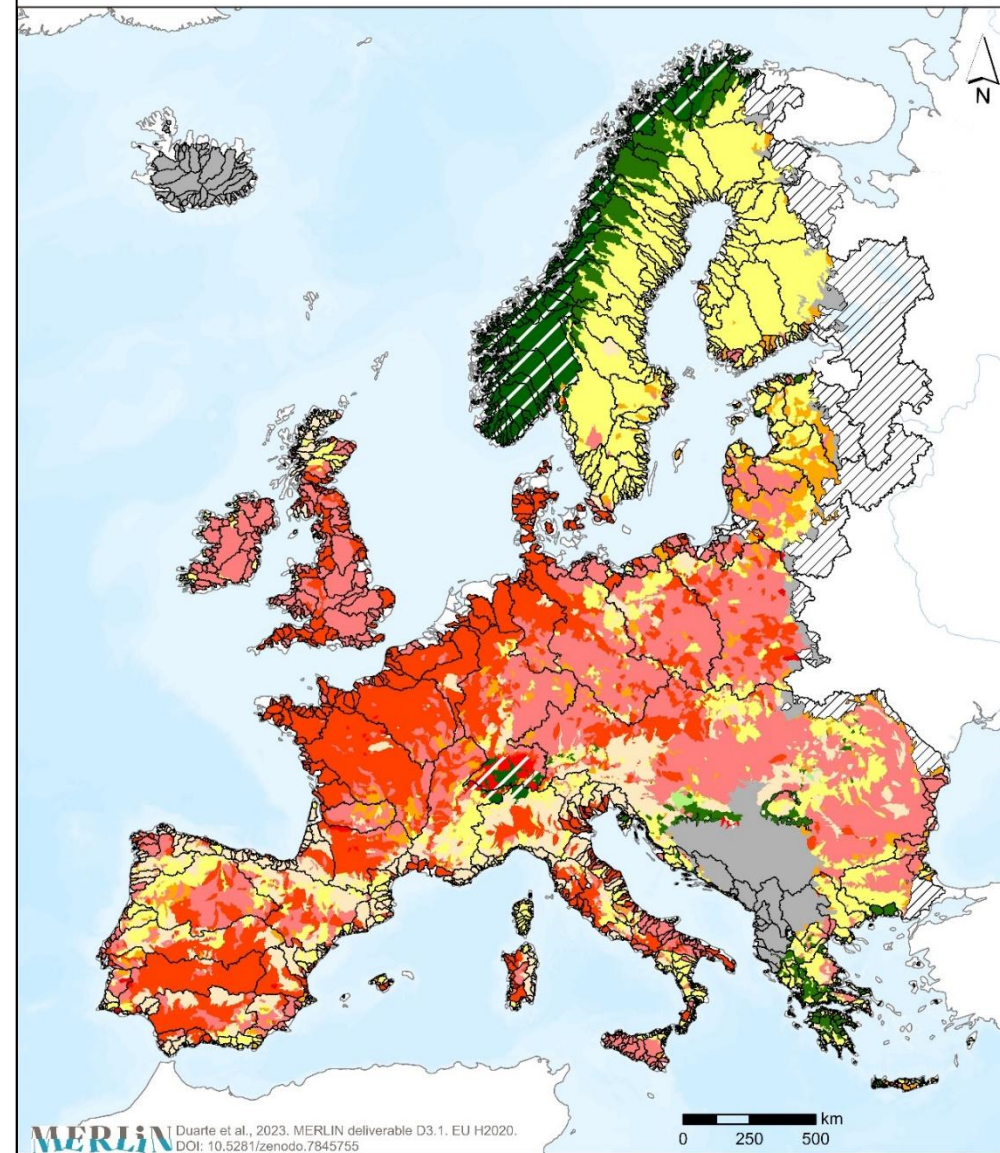

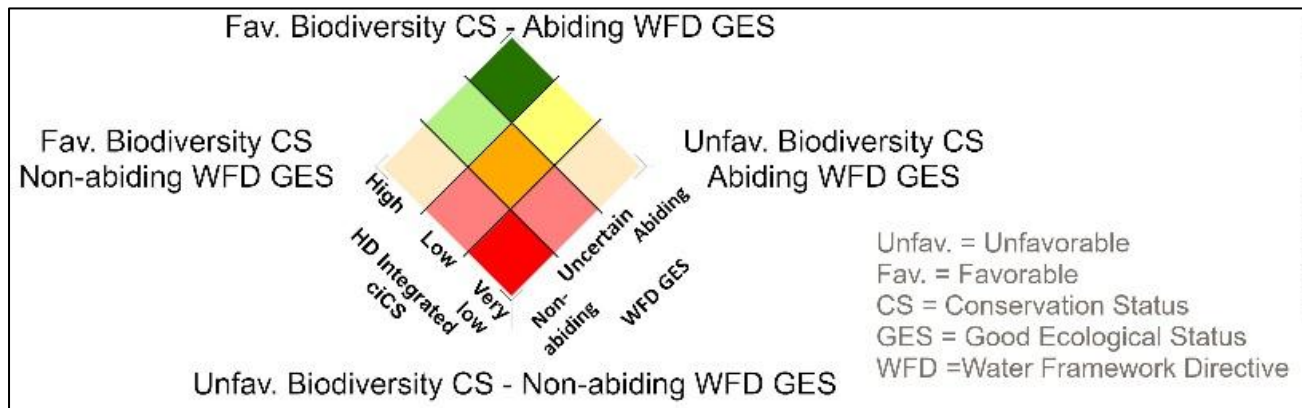

MERLIN Duarte et al., 2023. MERLIN deliverable D3.1. EU H2020. DOI: 10.5281/zenodo.7845755

Detailed cICS

35	32	24	21	13	No data	Area of R2Us out of EU
34	31	23	15	12	Unclassified	Basins
33	25	22	14	11		

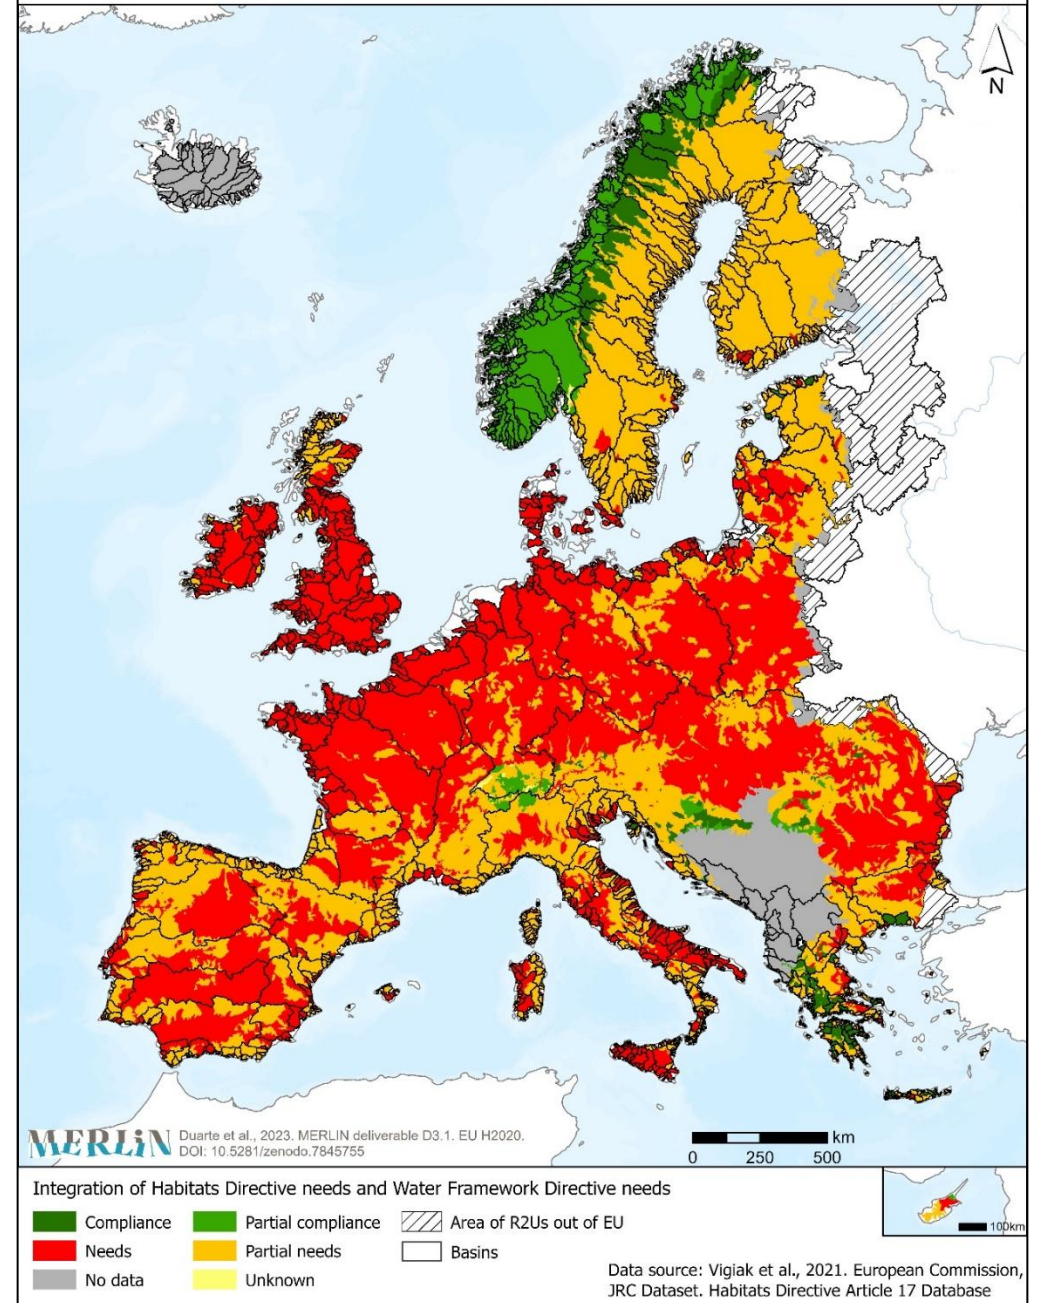

Data source: Vigiak et al., 2021. European Commission, JRC Dataset

Restoration Needs -Integration of Habitats Directive and WFD related needs

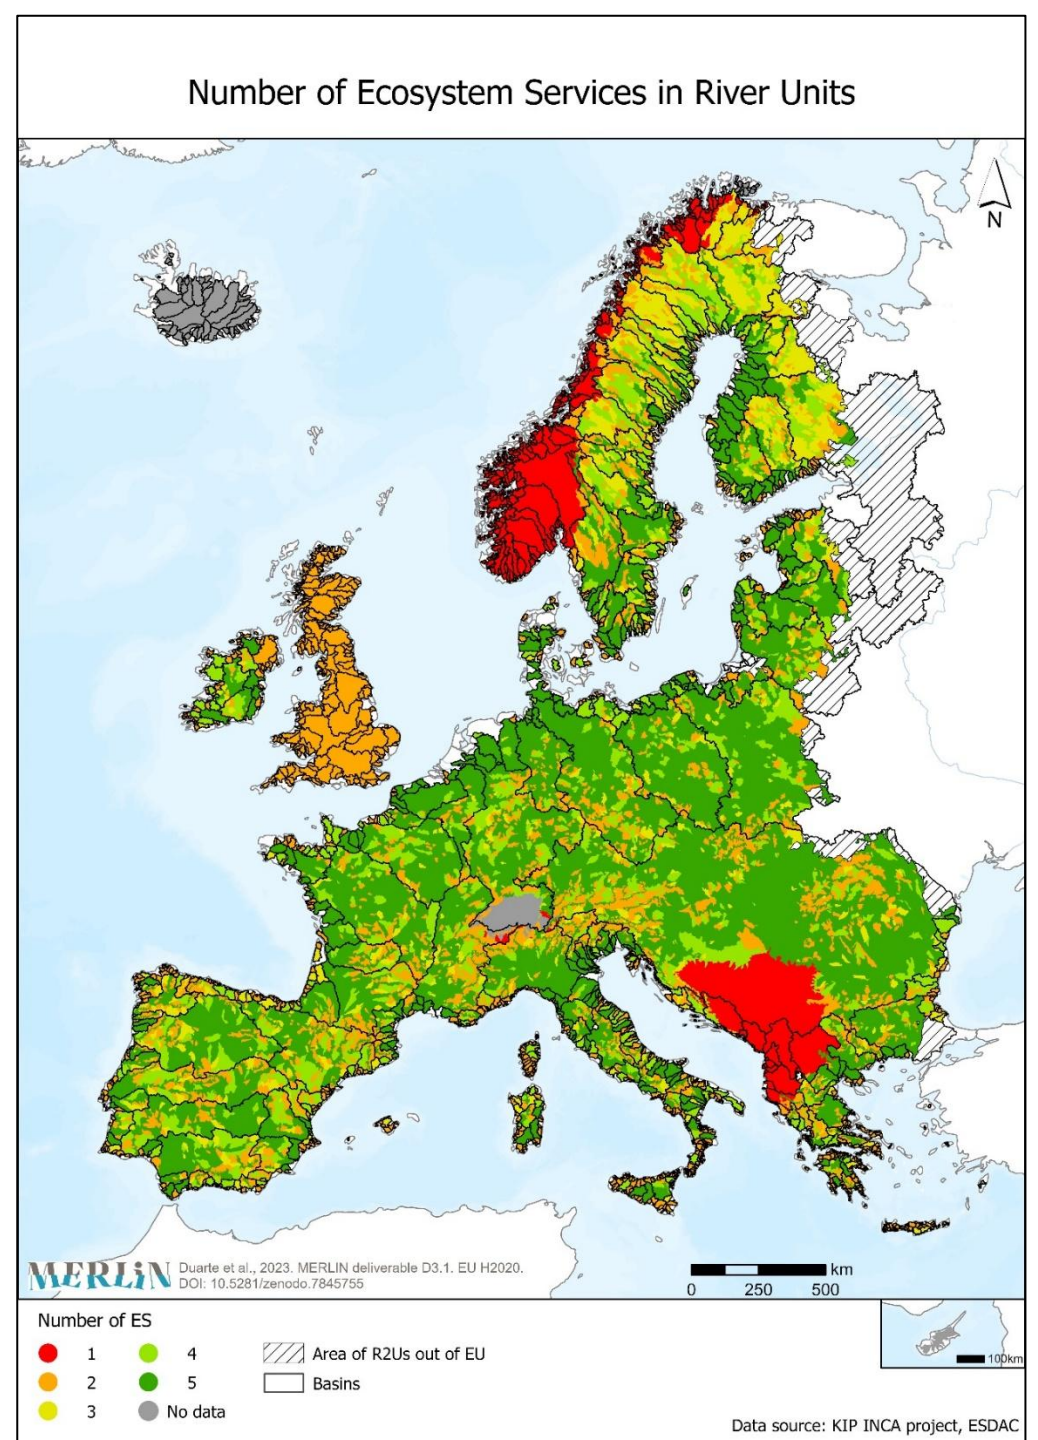

Restoration needs

Restoration needs in River Restoration Units

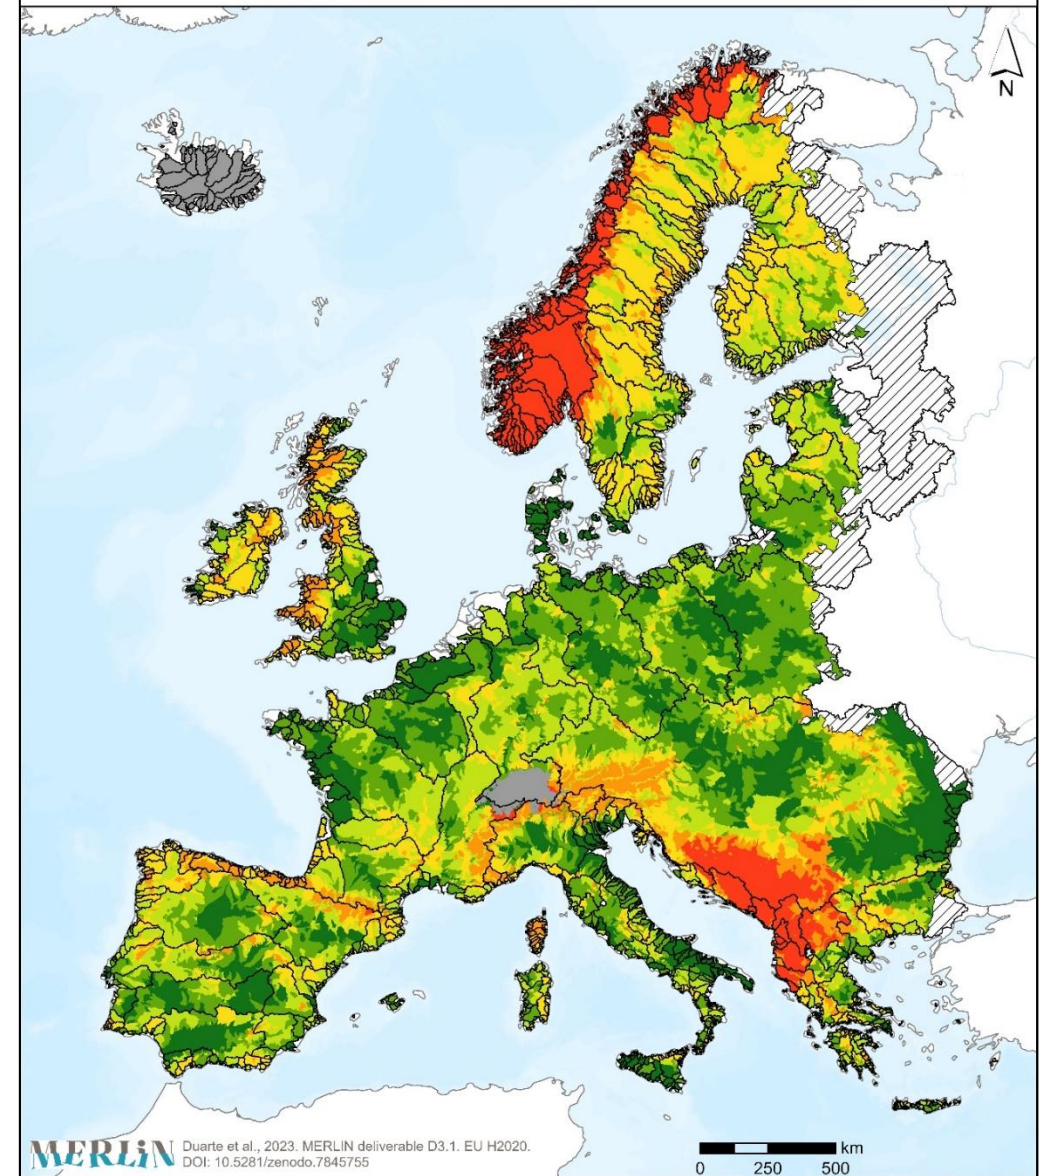

Restoration potentials

Restoration potentials

Restoration potential Co-benefits

Ecosystem Services Assessment Indicator in River Units

Average values per R2U

Higher values indicate areas with fewer ES present or higher demand

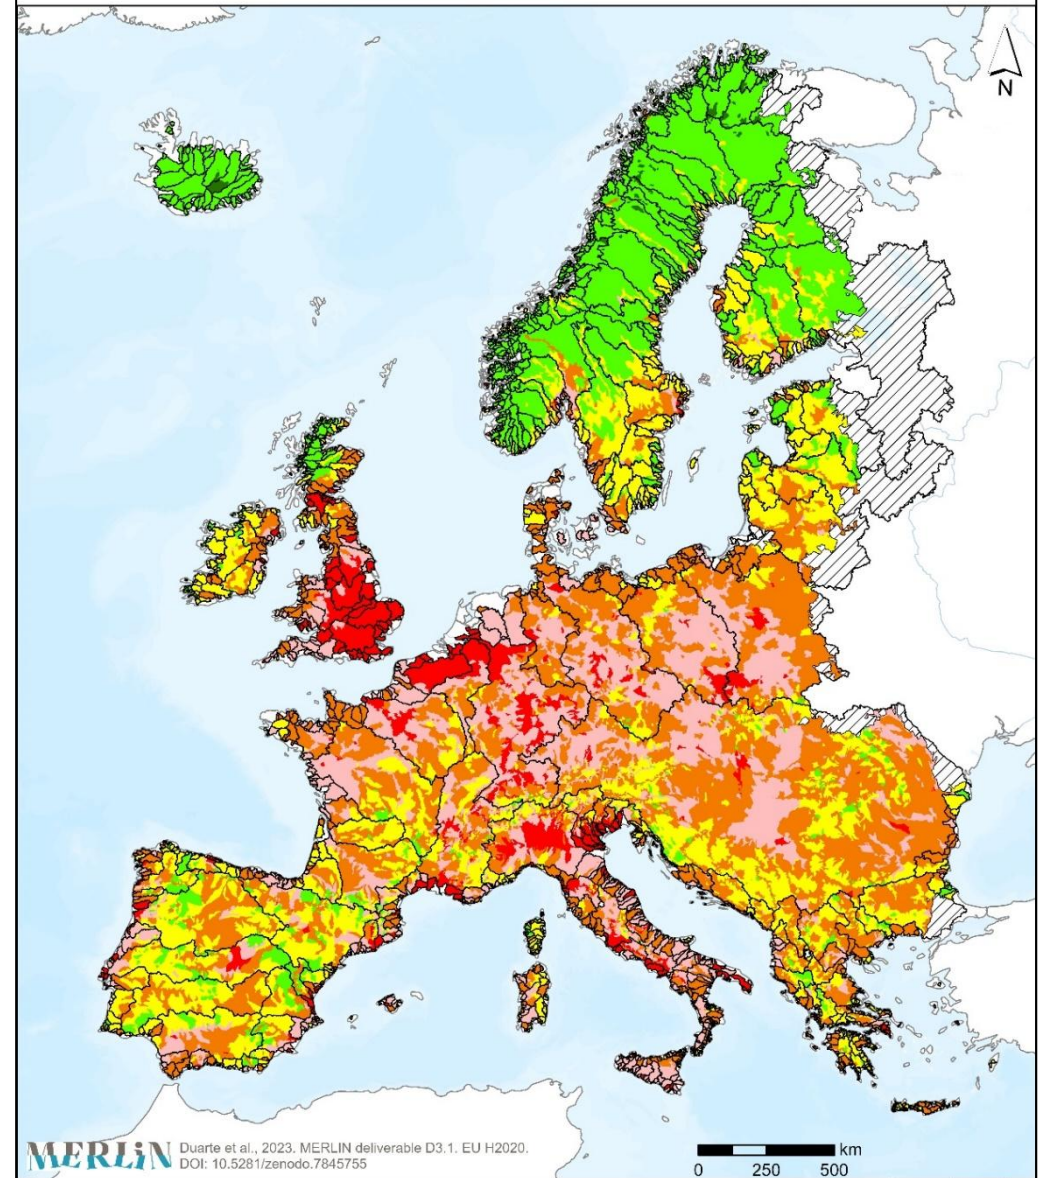

Data source: KIP INCA project, ESDAC

**Restoration
constrains**

Restoration constrains

Human Footprint Index in River Units, 2018

LIGHTNING, MASTER OF THE ELECTRIC BOLTS OF THE SKY, HAS VOWED TO AID HUMAN LIBERTY AND JUSTICE. HE FINDS HIS POWERS TESTED BY THE MAD AND HEINOUS PLOTS OF PROFESSOR GROSSKOP, A NAZI WHO HAS BEEN SMUGGLED INTO THIS COUNTRY AND WHO SPEAKS PERFECT ENGLISH. UNKNOWN TO THE WORLD DEATH AND DESTRUCTION STALK THE GREAT POWER DAM ON THE COLORADO RIVER.
