Both models work with high-end peristaltic pumps:
- one pump for SP;
- two pumps for SAP
(one for the sample, one for the cleaning)

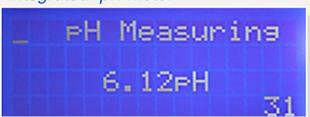

Embedded function real date and time - registers the exact time for delivery of milk in the milk collecting center

Visualisation out of range measurement

Conductivity - built-in conductivity sensor gives high performance freezing point analysis - avoid poor quality milk due to added water; detects mastitis and falsifications with added salt

Integrated pH meter
